Megaform And The EMAS Certification...

Since September 2010, Megaform has been taking several steps to the EMAS certification, in order to be certified in the second Semester of 2011.

What does EMAS stand for:

EMAS (Eco-Management and Audit Scheme) is a voluntary environmental management system (EMS), under which companies and other public organisations evaluate, manage and continuously improve their environmental performance. EMAS has been operative since 1995. The latest revision (EMAS III) came into effect on 11 January 2010. Currently, more than 4,400 organisations and approximately 7,600 sites are EMAS-registered.

The core elements of EMAS are

- ✓ **Performance:** Carrying out annual updates of environmental policy targets and actions to implement and evaluate these targets.
- ✓ **Credibility:** Third party verification from independent auditors guarantees the value of both actions taken and disclosed information.
- ✓ **Transparency:** Environmental statement provides information to the public on environmental impact and performance of the organisation.

Steps to EMAS Registration:

1. Adopt an environmental policy;
2. conduct an environmental review;
3. in the light of the results of the review, establish an effective environmental management system;
4. carry out an environmental audit;
5. provide a statement of its environmental performance;
6. use the EMAS logo.

EMAS goes further than ISO 14001:

In concrete terms, Megaform's objectives are oriented as follows:

1. Reduce and prevent pollution-related activities:
 - Reduce energy consumption (electricity, heating and water);
 - Reduce waste discharge through better prevention and recycling measures;
 - Improve the mobility aspect in its activities.
2. Establish an environmental management system like EMAS.
3. Ensure compliance with legal requirements applicable, to which MEGAFORM subscribed relating to its environmental aspects;
4. Ensure continuous improvement of environmental performance;
5. Inform and educate staff to optimize this participatory process based on continuous improvement;
6. Communicate periodically with our customers on the improvements achieved in our sustainable development initiatives and introduce innovations in this field;
7. Integrating sustainable development in all present and future aspects of MEGAFORM.
